MEETING OUTLINE · YOUR COPY, NOT MICHELE'S

Epos Sync & Rewards Program

Talking points for today's check-in — keep the API/technical detail out of the conversation, just the decisions

1 · Epos → Shopify product sync — what to say

- There's a native app in her Epos Now back office that does real-time, two-way sync — products, stock, customers, order history. No custom code needed for this part.
- **Ask her for:** help getting into the Epos Now back office (her login) so the Shopify app can be installed and connected.
- **What happens after:** test with one product first, then sync her full catalog, then the 18 TEST products come off the site.
- **Flag, don't promise:** whether Epos or Faire charge a per-transaction or per-SKU fee for this — still unverified, confirm before turning it on for good.

2 · Rewards program — the decision to get today

Path A — Build it custom

$0/MONTH, FOREVER

- Runs on Epos + Shopify + a Zapier automation — tools she already pays for
- ~10–16 hrs of build time on my end; live roughly a week after her rules + Epos credentials are in hand
- No VIP tiers or badges out of the box — earn points, redeem for a discount, balance shown on her account

Path B — Off-the-shelf app

~$15–49/MO (SMILE.IO OR RIVO)

- Live same day, no build time
- VIP tiers, referrals, badges available if she wants that polish
- A recurring line item, forever, on top of Shopify

Default to Path A — it's what the packet already promised her ("no monthly rewards-app fee"). Switch to Path B live in the room only if she wants VIP tiers/badges, wants it live in days not weeks, or timeline pressure builds before Oct 15 — an app can launch first and the custom build can swap in later without disrupting customers.

3 · Get her rules — circle or write in as she answers

1 **Points earned per $1 spent**

□ 1 □ 2 □ other: _____

2 **Points needed for a reward**

□ 100 □ 250 □ other: _____

3 **Reward value**

☐ $5 ☐ $10 ☐ other: _____

4 **Bonus for joining**

☐ Yes ☐ No ☐ amount: _____

5 **Birthday bonus**

☐ Yes ☐ No ☐ amount: _____

6 **Points expire?**

☐ Never ☐ 12 months ☐ other: _____

MEETING OUTLINE · YOUR COPY

Everything else to close out today

Be-YOU-tiful Boutique by Michele

Walk out of this meeting with

- [ ] Epos back-office access (her login, or add you as admin) — needed to install the sync app
- [ ] Faire account status — is she on Faire already? If so, get the account details
- [ ] All 6 rewards rules above, circled
- [ ] Custom build vs. app decision for rewards (Path A / Path B)
- [ ] "Silver" brand confirmed — Silver Jeans Co., or something else?
- [ ] Her last name, spelled how she wants it on the About page
- [ ] Best sellers to feature — or confirm she's still thinking on it
- [ ] Remind her: pay-in-4 and any new payment method are on hold on purpose until the store transfers into her own Shopify account — not something she needs to act on today

> Full technical build steps for both the sync and the rewards program are written up separately (Epos Product Sync Guide, Custom Rewards Build Guide, Rewards App Options) — reference those after the meeting, not during it.

Notes from today
